

bodometrics & sports gear experts

bodometrics & sports gear experts

made in italy since 1980

Born in 1980, in a heartland of cycling passion that is Veneto, Italy, Ftech emerged from the successful collaboration between Massimo Fantin and his aunt Teresa, both experts in the cycling industry with over 20 years experience.

The combination of their extensive backgrounds in innovation, research, technical performance and a pure passion for cycling helped Ftech quickly develop into a world leader in custom cycling apparel, a stamp that it is proud of today.

In the search for perfection in custom cycling clothing, Massimo and Teresa established a headquarters, as well as research & development and production laboratories in Bassano Del Grappa, Italy, a hub for some of the worlds best craftsmen when it comes to cycling.

Ftech is continuously pushing the boundaries of cycling apparel technology, striving to revolutionize the industry through its innovative products.

Italian tradition, technology, ergonomics, design, quality and manufacturing experience using the best fabrics available form the deep-set roots of the company's foundation.

Ftech's production is largely focused on customizing premium cycling wear around the individual requirements of each end consumer, creating a product that is unique to their needs.

Our mission and passion is to make premium, fully customized cycling apparel 100% **Made in Italy**.

From design concept to order delivery, our exceptional team will ensure that you and your mates look forward to wearing your new kit year after year.

At Ftech we want you to “**Ride your own style**”, therefore our custom program is all about you and your dream!

Our in-house graphics department works in tandem with our in-house manufacturing facility to take your order all the way from artwork conception to final end product realization. Whether your team or organization has completed artwork or merely a rough idea for a design, we will work with you through every stage to help you realize your vision.

- **No minimum order quantity required**

Cost is based on the quantity of garments ordered, so the more you buy the less you pay! We offer a wide variety of garments and accessories for both winter and summer. Be sure to plan ahead for reorders if you anticipate your order growing.

- **Turnaround time is only 30 working days**

Garments will be ready for shipment after 30 working days from receipt of full payment.

- **Made in Italy craftsmanship**

Not only does the manufacturing process take place in Italy but also all our materials are 100% Italian.

- **No colour limitations**

With the Ftech Custom Program there are no colour limitations thanks to our Unlimited Digital Colour System technology.

- **3D preview**

To remove all doubt we provide you with a 360° mock-up of how your cycling kit will look before ordering.

- **FTECH PSG™ – Proportional Scaling Graphics**

Unlike traditional sublimation where one set of artwork is used for every size, not guaranteeing good visibility of graphics and logos, we prepare separate artwork for every garment and every size. The “Proportional Scaling Graphics” PSG™ is another exclusive quality of Ftech; it was carefully studied to obtain the right proportions of the designs and of the logos on different types of garments.

All the products included in this catalogue can be customized.

2. Printing

Graphics are printed with our latest generation plotters using sublimation inks on dedicated paper

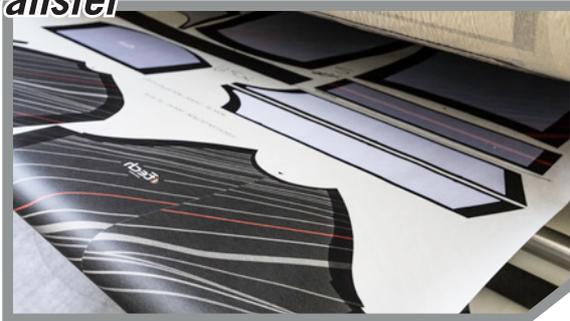

1. Graphic Project

Our designers let their creativity flow to create the best artwork to satisfy our customers' requests

3. Transfer

Prints are transferred from papers to fabrics through our calender (press machine)

4. Tailoring

Our professional seamstresses sew all pieces together bringing our garments to life

5. Quality Control

Each garment is carefully inspected and then packed into our Ftech bags

cycling

TEAM JERSEY

bodymetrics & sports gear experts

The ideal cycling jersey for those seeking quality and comfort without compromising on performance

- HydroFtex soft touch
- Full length concealed zip
- 3 rear pockets
- Reflective stripe under rear pocket

MEN

cod. JS04041
size: FROM 2XS TO 5XL

WOMEN

cod. WJS04041
size: FROM 3XS TO 4XL

**HYDRO
FTEX**
soft touch

HydroFtex soft touch
Lightweight polyester made of small honey-combs structure to increase airflow and to wick moisture away

Full length concealed zip
To avoid interruption of graphics so that details of your design and logos are represented in full

Reflective stripe
Cycling safely with added visibility

PERFORMANCE SPACE

E.I.T. Performance Space is the Product of Excellence for extra-long distance rides. Its structure provides proper ischiatic support by shifting the pressure more towards the back of the saddle than the front. A specific study on how genitals move during cycling, inspired the development of a special "encased" shaping in the top part of the chamois which allows for improved fit and greater privacy.

- Disciplines: Road
- Quadruple density foam
- More than 6 hours endurance

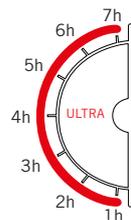

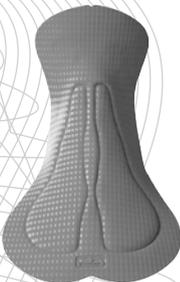

CARBON AIR

E.I.T. Carbon Air chamois, with a unique curved anatomic shape to curve perfectly with human anatomy where it meets the bicycle saddle. E.I.T. innovative Carbon Air has special high density foam inserts placed at key pressure points, a series of internal micro holes for perfect breathability and a special central channel to relieve pressure just from the perineal area to provide maximum comfort and performance.

- Disciplines: Road, Off Road
- Triple density foam
- More than 6 hours endurance

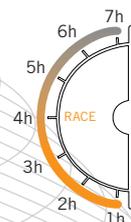

ENDURANCE AIR

E.I.T. Endurance Air Men has centrally sewn inserts and is made with a new generation of high density foams. The X-Tract fabric structure has a double layer which helps collect and expel moisture. The perforated base layer provides increased breathability and quick dry. Endurance Air is best for long rides.

- Disciplines: Road, Off Road
- Double density foam
- More than 5 hours endurance

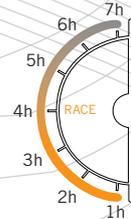

SPEED AIR

E.I.T. Speed Air Men is a pad with dual density that offers excellent comfort and freedom of movement, an enhanced anatomic three dimensional shape and E.I.T. X-Tract fabric, which guarantees all-way stretch and matchless softness. Perforated foam for extra ventilation.

- Discipline: Road, Off Road
- Double density foam
- More than 5 hours endurance

SUPER TRI AIR

E.I.T. Super-Tri Air pads have a special design developed to provide maximum performance and comfort for multi-sport athletes. The perforated short insert with high density foam, provides maximum protection with a slim profile. Plus, EIT Super-Tri pads with all-way stretch fabric platform guarantee total freedom of movement and excellent fit.

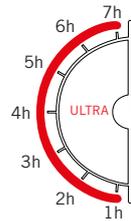

- Discipline: Triathlon
- Single density foam
- More than 3 hours endurance

powered by

*male
chamois*

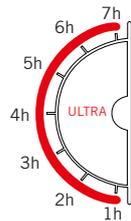

PERFORMANCE SPACE

E.I.T. Performance Space representing the latest in terms of chamois technology. Its structure delivers perfect fit and greater saddle stability. The Space pad supplies proper ischiatic support shifting the pressure more towards the back of the saddle than the front. Special "slide shaped" edges along the perimeter of the central insert make for a smooth transition in correspondence to the inner leg area.

- Disciplines: Road
- Triple density foam
- More than 6 hours endurance

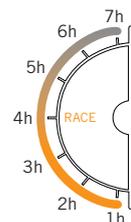

GEM AIR

E.I.T. Gem Air has been specially designed just for female anatomy with a unique pearl shaped high density insert. Gem Air pad is made with the newest hi-performing E.I.T. X-Tract microfiber, featuring a double layer structure that helps collect and expel moisture. The perforated base layer provides increased breathability and quick dry.

- Disciplines: Road, Off Road
- Triple density foam
- More than 6 hours endurance

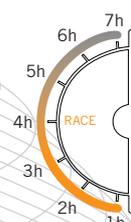

ENDURANCE AIR

E.I.T. Endurance Air Women pad has a specially shaped central protective insert zone which has been refined in this new model with a smaller and more accurate protective area. Besides, E.I.T. X-Tract structure has a double layer which helps collect and expel moisture. The perforated base layer provides increased breathability and quick dry.

- Disciplines: Road, Off Road
- Double density foam
- More than 5 hours endurance

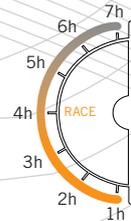

SPEED AIR

E.I.T. Speed Air Women is a pad with dual density foam construction, an enhanced anatomic three dimensional shape and the special high comfort E.I.T. X-Tract fabric, which guarantees all-way stretch and matchless softness. Perforated foam for extra ventilation.

- Discipline: Road, Off Road
- Double density foam
- More than 5 hours endurance

SUPER TRI AIR

E.I.T. Super-Tri Air chamois have a special design developed to provide maximum performance and comfort for multi-sport athletes. The perforated short insert with high density foam, provides maximum protection with a slim profile. Plus, E.I.T. Super-Tri Air chamois with all-way stretch fabric platform guarantee total freedom of movement and excellent fit.

- Discipline: Triathlon
- Single density foam
- More than 3 hours endurance

READY TO GET STARTED IN 5 STEPS?

1. ASK FOR A FREE QUOTATION

Contact us at info@ftech.it or by phone at **+39 0424 518878** to receive all the relevant information.

2. QUANTITY AND PRODUCT INFO

At this point it will be important to get your people in order to decide on quantities and sizes. Our sizing chart is a great way to visualize our sizing patterns, but the only way to be sure you are getting the right size for you is to request our Ftech sizing kit.

3. DESIGN INFO

Send us your design ideas, logos, Pantone colors and any other information that will be needed to produce your selected garments. Refer to the “**Artwork Requirements**” section on the next page.

4. GRAPHIC PROPOSAL AND 3D PREVIEW

We will send you our graphic proposal within 5 working days. Once the artwork is defined a 3D preview of the cycling kit will be sent to you.

5. ORDER CONFIRMATION AND DELIVERY

You will receive the order confirmation with all the details. After 30 working days from receiving the full payment your order will be ready for shipment.

ARTWORK REQUIREMENTS

VECTOR

BITMAP

LOGOS

Our graphics department works on the Apple Macintosh OS X platform. For best results with your custom clothing, we strongly recommend logos and files to be in Vector format.

The following file types are preferred:

Adobe Illustrator – .AI files

Encapsulated Post Script – .EPS files

High resolution (over 300 dpi) – .PDF files

Why Vector file and what is it?

Vector file is created in a vector-based software program such as Adobe Illustrator or Macromedia Freehand. It is based on points and lines created from mathematical equations and can be easily edited or scaled with the click of a mouse. Vector artwork typically has .EPS, .AI, or .PDF file extensions.

The side pictures show the difference between a vector logo and a bitmap logo (.BMP, .JPEG, .JPG, .GIF file extensions). When the vector logo is resized and manipulated it stays crisp and clean. When the bitmap logo is enlarged, it becomes distorted and pixelated, making this file type unsuitable for use.

Customers are solely responsible for obtaining proper permission for the use of all logos before submitting them. Logos must be submitted with all brand identity requirements.

COLORS

Colors should reference the Pantone® Matching System.

Generally, PMS colors can vary depending on the fabric used, inks used, and method of printing. At Ftech we use the latest, state of the art digital sublimation technology, with the finest quality inks and fabrics, however the same PMS or CMYK color may vary slightly in appearance across different types of fabrics due to their individual properties (ie. weight, density, thread count, texture, etc...). If you are not 100% certain about the colors we can provide you with a sample fabric swatch.

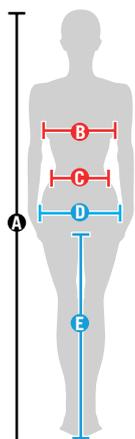

FONTS

Make sure to convert all your text to outlines in Illustrator or include your font files, otherwise your fonts may be automatically converted to something you don't like or want.

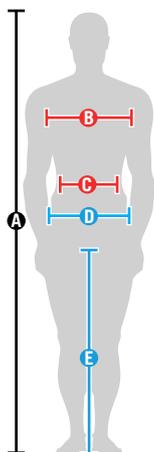

Files can be accepted via e-mail at info@ftech.it or on cd.
